

## Archiving & Scanning

Achieve an enterprise-wide paperless environment

Whether your organization is operating MEDITECH's MAGIC or Client/Server HCIS, you have options when it comes to selecting an archiving and scanning system! Iatric Systems has partnered with ISSolutions to provide the MEDITECH community with an enterprise-wide, highly integrated, cost-effective archiving and scanning option. Our **Archiving & Scanning** solution includes:

- ✓ Point-of-service scanning seamlessly integrated with your staff's existing MEDITECH workflow
- ✓ Rapid batch scanning effective for use in high-volume areas like HIM / Medical Records
- ✓ Automatic archiving of system generated reports, such as Lab results and discharge summaries
- ✓ Advanced data retrieval, including full text search and annotation capabilities

### Key Advantages:

- ✓ Enables areas throughout the organization to move closer towards a paperless environment
- ✓ Stores data from MEDITECH \*and\* other software systems
- ✓ Utilizes bar code technology for automatic indexing of documents
- ✓ Provides immediate access of stored images to authorized users throughout the organization
- ✓ Provides direct access to patient documents through PCI (at MAGIC sites) and EMR (at C/S sites)
- ✓ Allows access to stored images even during MEDITECH downtimes
- ✓ Improves staff efficiency
- ✓ Provides a cost-effective alternative to other systems available in the MEDITECH marketplace

MAGIC and Client/Server hospitals are already utilizing **Archiving & Scanning**. Find out why. Contact us today using the information below to learn more.
