

C/S Link is designed to provide a more complete EMR to your clinicians by seamlessly linking EMR with non-MEDITECH systems.

Effectively Integrate Applications with EMR

Is your EMR module missing important patient data from non-MEDITECH systems? Do you avoid using non-MEDITECH systems because clinical information will not show up in EMR? If either answer is “yes”, Iatric Systems can help. Let us show you how with C/S Link.

C/S Link launches applications from icons located at the top of your EMR screen (see screenshot below), and can bring clinicians directly into the same patient within those applications to avoid extra keystrokes.

The user’s EMR session continues to stay active even after clicking on the link, so clinicians can view patient data in non-MEDITECH applications and EMR simultaneously.

Key Advantages Include:

C/S Link is designed to provide a more complete EMR to your clinicians by seamlessly linking EMR with non-MEDITECH systems, including:

- Iatric applications
- Any external executable program (for example, PACS viewing)
- Specific website urls
- Other MEDITECH marketplace third party vendor systems (for example, Array and MSM/Picis)

For more information on **C/S Link**, or any other Iatric Systems products or services, please contact us using the information below.
