

## Iatric EasyConnect Plus Interface Engine

Healthcare system Interoperability takes a giant leap forward with the introduction of Iatric EasyConnect Plus.

Iatric Systems built this newest member of its **Interoperability Data Exchange** from the ground up to seamlessly eliminate the data connection barriers between disparate healthcare systems. Iatric EasyConnect Plus provides virtually effortless links between multiple applications.

### **Achieve seamless Interoperability in a single day.**

Because Iatric EasyConnect Plus is a web-based solution, after your server hardware is in place your interface engine will be ready to use in as little as a single day.

# Iatric EasyConnect Plus Interface Engine

## Features & Benefits

### Interoperability has never been so easy.

Iatric EasyConnect Plus delivers a full scope of advanced interface tools that seamlessly and effectively communicate data to thousands of disparate systems.

### Drag and drop your settings.

#### Iatric EasyConnect Plus does the rest.

Simply drag and drop elements to set up filters, templates and other functions. Then, let the dashboard manage and monitor your system 24/7, keeping you informed with regular status alerts. If you prefer, Iatric Systems monitoring is available as an option.

- **View** legacy Iatric Data Port (IIR), MEDITECH's NMI, and the Iatric Interface Manager (IIM), plus any vendor application capable of responding to HL7 queries.
- **Process** HL7 2.x files, text or delimited file types, XML—including Clinical Document Architecture (CDA) and Continuity of Care Document (CCD) files meeting HL7 standards.
- **Set up** filtering, templates and other functions with drag-and-drop ease.
- **Conduct** high-level monitoring. See the status of your connections real-time on a color display status board and receive alerts as they happen for quick action and resolution

### Reduce your implementation costs.

End the need to pay for individual point-to-point interfaces and having to dedicate IT staff to interface management. The Iatric EasyConnect Plus intuitive Creator lets you quickly and easily create your own custom interface or import an existing one.

### Reduce technology barriers.

Easily integrate this Interoperability solution with an extensive number of software systems.

### Maintain a complete audit trail to track activities.

See all the activity in audit logs and seamlessly export data to Iatric Systems Security Audit Manager (SAM).

### Key Advantages Include:

- Eliminate the barriers of data exchange that can impede connection with your regional Health Information Exchange (HIE).
- Simplify sharing of patient results with physician offices and other hospital departments.
- Prevent downtime and data loss with Iatric Systems High Availability feature.
- Do it all without burdening your already limited resources.
