

MDOOrder allows physicians to place orders on-line from any location and automatically sends orders to the HIS.

Electronic Outpatient Orders

Do your physicians want to send electronic outpatient orders to your HIS system? Whether the specimen is drawn in the office or the patient is sent to the hospital lab, your physicians can use **MDOOrder** to send all orders electronically. Orders can be transferred directly into your HIS or placed in a work queue. The physician's office staff can even print demographic labels, requisitions and print manifests for their courier.

MDOOrder is part of the IatriConnect Solutions suite of applications. For a demonstration or more information on MDOOrder, or any other Iatric Systems products or services, please contact us using the information below.

Key Advantages Include:

- Cost effective, web-enabled and secure
- View clinical results and place orders when used in conjunction with MDAccess
- Send electronic outpatient orders for Lab, Microbiology, Blood Bank and Radiology
- Personalize your dashboard
- Process orders on an existing patient or enter a new patient
- Access for both physicians and office staff
- Build your favorite tab for common tests and order sets
- Enter diagnoses codes and enable the ability to check Medical Necessity before submission
- File orders directly into your HIS or to a work queue
- Adapt MDOOrder to your hospital and physician work flow
- Print demographic label for specimen identification
- Print requisitions in the physician office to send with specimen or patient
- Print manifest to send with specimens
