

Patient Discharge Prescriptions saves clinicians time and reduces medication errors by generating legible discharge prescriptions.

Patient Discharge Prescriptions

Features & Benefits

Online prescription generation for physicians

Do you want to save clinicians time and reduce medication errors? If so, Iatric Systems' **Patient Discharge Prescriptions (PDP)** is just what the doctor ordered. Illegible, hand-written prescriptions risk patients' health and waste pharmacists' time. With PDP, legible discharge prescriptions are generated quickly and easily *and* PDP can help hospitals meet Joint Commission medication reconciliation requirements as well (see our Medication Reconciliation brochure for details).

Iatric Systems developed PDP with physicians, for physicians. Physicians save time by taking advantage of information already in the MEDITECH Pharmacy module. You can access information directly via Electronic Medical Records at Client Server sites, via PCI at MAGIC sites or via any NPR main menu a physician has. PDP eliminates call-back questions and allows physicians to generate prescriptions in just a few keystrokes with very little training. PDP is a cost-effective way to reduce patient medication errors immediately, before or while you install a CPOE system.

Key Advantages Include:

- Reduces medication errors
- Reduces pharmacy call-backs
- Enables faster discharge of patients
- Requires very few keystrokes
- Retains a history of discharge prescriptions for each patient
- Facilitates medication reconciliation

For more information on **Patient Discharge Prescriptions**, or any other Iatric Systems products or services, please contact us using the information below.

The screenshot displays the 'PROCESS PATIENT DISCHARGE INSTRUCTIONS' window. At the top, patient information is shown: Patient: IATRIC.PDI, Account #: M00000011080, Unit #: M00000194. Below this, Room/Bed: 0238 A, Adm/Ser Date: 02/08/07, Dis Date: (blank), Att Dr: Andre, Michel MD, and Category: DMI - Discharge Medication Instructions. A toolbar includes options like Edit, Copy, Add, Delete, Special, Print, and Delete. The main area is a table of prescriptions:

PRESCRIPTION	DOSE	SIG	ROUTE	E
ALENDRONATE TABLET	10 MG	Once Daily 30min Be	By mouth	
AMOXICILLIN CAPSULE	500 MG	Three		
ATORVASTATIN TABLET	20 MG	9 p.m.		
CAPTAPRIL TABLET	12.5 MG	Three		
CARVEDILOL	25 MG	Once D		
DIGOXIN TABLET	0.25 MG	Once D		
ESTROGENIC SUBSTANCES TABLET	0.3 MG	Once D		
FUROSEMIDE TABLET	40 MG	Once D		
LevoTHYROXINE TABLET	125 MCG	Once D		
ZOLPIDEM TARTRATE TABLET	5 MG	Bedtim		
CHOLESTEROL PILL	1 TAB	Once D		
DIGOXIN TABLET	0.25 MG	Once D		
FUROSEMIDE TABLET	20 MG	Once D		
LevoTHYROXINE TABLET	125 MCG	Once D		
METOPROLOL TABLET	50 MG	twice		

Below the table, a generated prescription form is shown. It includes the pharmacy name 'The Eddy', the pharmacist 'Nolin, John TESTMD', and patient details for SMITH, MARY. The prescription is for CAPTOPRIL TABLET 25 MG, Daily, By Mouth, FOR HIGH BLOOD PRESSURE. The form also shows 'Dispense: 30' and 'Refill: 1'. At the bottom, there is a section for 'PRESCRIBER SIGNATURE' and a checkbox for 'Dispense As Written'.
