

PATIENT DISCHARGE PRESCRIPTIONS (PDP)

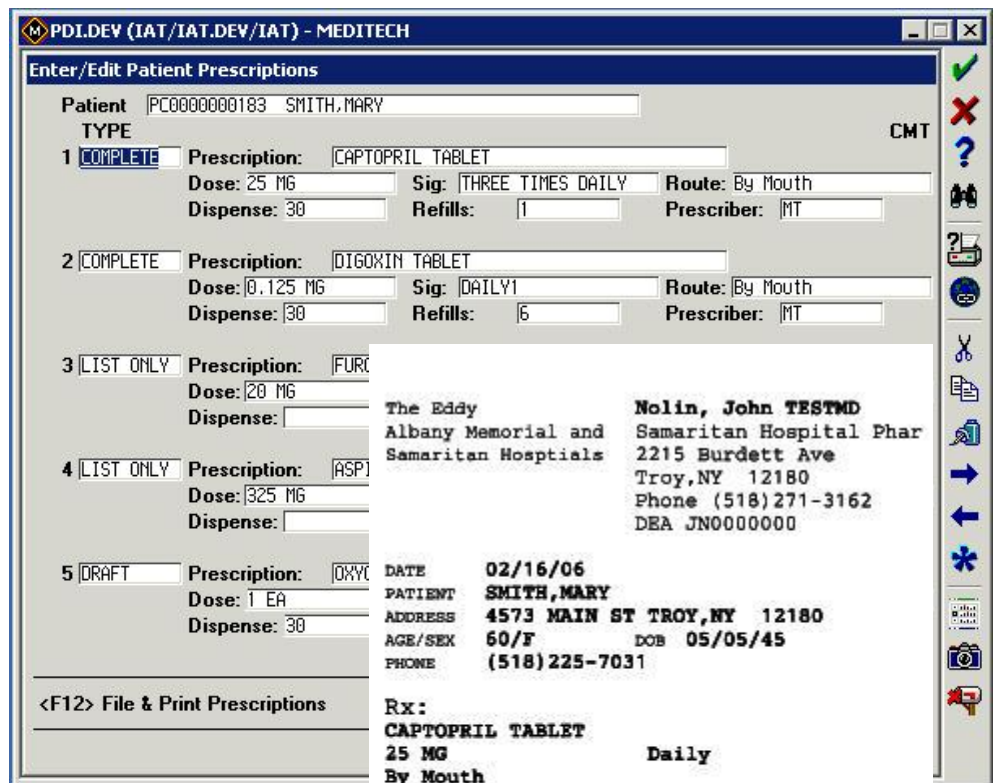

Online Discharge Prescription Generation for Physicians

Would you like to save clinicians time? Would you like to reduce medication errors? If so, Iatric Systems' **Patient Discharge Prescriptions (PDP)** is just what the doctor ordered. Illegible, hand-written prescriptions risk patients' health and waste pharmacists' time. With PDP, legible discharge prescriptions are generated quickly and easily.

PDP was developed with physicians, for physicians. Physicians will save time by taking advantage of information already in the MEDITECH Pharmacy module, and PDP can be accessed directly via EMR or any physician accessible menu. PDP eliminates call back questions and allows physicians to generate prescriptions using a limited number of keystrokes with very little training. PDP is a cost-effective way to reduce patient medication errors immediately, before or while you install a CPOE system.

Key Advantages Include:

- ✓ Reduces medication errors
- ✓ Reduces pharmacy "call-backs"
- ✓ Allows for faster discharge of patients
- ✓ Requires a limited number of keystrokes
- ✓ Retains a history of discharge prescriptions for each patient
- ✓ Enables medication reconciliation

For a demonstration or more information on **PDP**, or any other Iatric Systems products or services, please contact us using the information below.
