

HL7 EasyConnect is a service-based solution that enables hospitals to gain the benefits of an interface engine without the hassles.

Major hospital systems with existing interface engines already have switched to HL7 EasyConnect in order to simplify their interface operations.

It takes more than software to run an interface engine. Hospitals must develop the appropriate staff to implement and support critical interfaces 24 hours per day, 365 days per year. Maintaining your own interface engine can be a vulnerable solution for IT Departments as employee turn-over, illnesses and vacations threaten operational support.

Iatric Systems has developed HL7 EasyConnect, which relieves your staff from having to maintain an interface engine. HL7 EasyConnect combines our robust interface engine software with our extensive implementation experience and our 24/7/365 support. With other vendors, you buy the software and YOU do all the work. With HL7 EasyConnect, you buy the software and WE do all the work.

Key Advantages Include:

- Robust interface engine
- Extensive experience
- 24/7/365 support
- Real-time alerts
- Data stream duplication
- Data stream merging
- Field mapping
- Data transformation
- Filtering
