

# IATRISCAN (ISC)

## A Point of Service Scanning Solution

**IatriScan** is a cost-effective point of service scanning solution designed specifically to integrate with the MEDITECH HCIS. IatriScan combines the power of integration with the graphical capabilities of PC imaging software, allowing you to reduce paper shuffling and provide wider access to crucial data throughout your organization.

### Key Advantages Include:

- ✓ Paper copies and paper shuffling can be virtually eliminated by sharing documents on-line
- ✓ Multi-level security is built into the system
- ✓ Scanned images can be viewed on-line via virtually any MEDITECH application (ADM, B/AR, PP, etc.)
- ✓ At a fraction of the cost of other document imaging systems, IatriScan is highly cost-effective
- ✓ Direct integration with MEDITECH allows scanning to easily become part of existing procedures

**IatriScan Examples:** Many documents that are shared across a healthcare organization can be scanned. Here are some examples of documents commonly scanned using IatriScan:

- ✓ Advance Beneficiary Notices (ABNs)
- ✓ Insurance Cards
- ✓ EOBs
- ✓ Full Text of Outside Reference Lab Reports
- ✓ Employee Evaluations
- ✓ MM Shipping Invoices
- ✓ And Much More!
