

SCRIPTLINK+

FREE Standard Edition of the Next Generation Scripting Tool

For years, Iatric Systems has been supporting the MEDITECH community with two PC-based scripting tools: Scriptlink and ScriptMate. Both of these tools have been rolled into one, and many enhancements have been added to create our next generation scripting tool, **Scriptlink+**.

Now, Iatric Systems is pleased to offer Scriptlink+ Standard Edition to hospitals for FREE. We estimate that this Standard Edition will meet the needs of more than 90% of hospital users in the MEDITECH community. For those with strong programming skills and technical abilities, our Professional Edition will remain available at a very competitive site license fee.

To get a free valid license key for Scriptlink+ Standard Edition, visit www.iatric.com/scriptlink-request.asp

Key Advantages:

- ✓ FREE Standard Edition
- ✓ Designed specifically for use in the MEDITECH environment (MAGIC and Client/Server)
- ✓ Developed for use with simple Scriptlink Command language or more complex Microsoft Visual Basic applications
- ✓ Included is a user-friendly Script Recorder to help jump-start even the most novice script writers
- ✓ Detailed tutorials help novice users quickly become proficient script programmers
- ✓ Enhanced Scriptlink Editor has many new features, such as a Syntax Wizard, a Logic Checker, automatic backup, etc.

History – The original Scriptlink product was introduced in 1991 and was a pioneer in bringing simple and efficient scripting to the MEDITECH industry. Scriptlink was providing complex automated day end close activities to hospitals prior to MEDITECH's release of day end automation. Even today, many hospitals prefer Scriptlink Day End Close due to its reliability, extra capabilities and renowned support.

ScriptMate was introduced to the MEDITECH industry in the mid-90's as a Scripting Library designed to simplify the MEDITECH Script.DLL API. Since that time, hospitals have been using Visual Basic and other .NET languages to develop scripts aimed at increasing IT and department efficiencies.

Together, Scriptlink and ScriptMate have been used at more than 120 hospitals and health systems using the MEDITECH HIS.

Today – Scriptlink+ can help you automate your most basic tasks or develop complex integration applications. From simple dictionary edits to full featured day-end close or interface applications, Scriptlink+ was designed to help MEDITECH users improve processes and save money.
