

### **Physician Solutions — Bringing it all together**

Physicians need to assess patients' clinical needs quickly and effectively, whether it's during rounds at the hospital, in their offices, at home or on the road.

Physicians need to assess patients' clinical needs quickly and effectively. Regulations now require them to perform CPOE and reconcile medications. They long for an easy way to maintain patient problem lists and record progress notes. They need e-Signature and e-Prescribing.

They need a solution that will help them spend less time at the computer so they can spend more time with patients. Iatric Systems can help you meet these needs. The solutions and chart below illustrate how.

- **IatriCare** and **OrderEase** enable fast, efficient CPOE. Physicians can assess patients quickly, maintain problem lists, document progress notes, e-sign, e-prescribe, reconcile medications and more, all from a single screen.
- **MDAccess** and **MOrder** are web-based solutions that accomplish these goals even during MEDITECH downtime.
- **e-Prescribing** is Surescripts certified and can route discharge prescriptions to retail pharmacies.

To learn more or to see a demonstration of any of the products listed above, please contact us using the information at the bottom of this page.
