

EHI Export

Haystack iS certified health IT which stores electronic health information (EHI) supports the ability to export EHI in an electronic and computable format. Haystack iS is not clinical patient care software and is not accessed by patients.

[170.315\(b\) \(10\) Electronic Health Information Export](#)

The applications provide export of electronic health information (EHI) for a single patient as well as for patient population in the following formats.

Haystack iS provides capabilities for end users to export EHI. Permissions for export capabilities are governed by the Admin User Roles. Users with the ability to export can do so from Reports or Bulk Data Extractor which allows bulk data extraction. Data fields included in the export capabilities are configured by end users.

Users select data fields with options to export using Word, Excel, PowerPoint, PDF, TIFF File, HTML (web archive), CSV (comma delimited), XML with report data, and Data Feed.
